Lab 1

Michael Peterson

Questions:

- 1) They are from TwoActivities and not showing application state
- 2) onSaveInstanceState then onStop then onCreate then onStart
- 3) onCreate had the key android:viewHierarchyState in the bundle. This likely contains info regarding the orientation change.
- 4) It does not appear as though the activity was re-created because the onCreate method was not called.
- 5) The onCreate method was called with the url in the bundle
- 6) back -> website -> app (with old state brought back)
- 7) Neither one match my expectations.
